

Emmanuel Kaome

Front end software developer

Being a highly competent IT professional, my career objective is to use the academic knowledge and problem solving skills to think creatively and express solutions clearly and accurately. I have acquired, to this day experience in front end web development, database management, fair understanding in back end development with C#, cloud computing with Amazon Web Services, website design and general IT support. As a junior developer, I thrive to produce highest quality code, learn new things and analyze results in an understandable way for my team mates. All this, I do it passionately with utmost professionalism, principles and ethics.
